

Why am I an actress? To tell stories from heart to heart.

The artist has always been a person which I respected and admired because of his/her capacity to analyze reality from outside and transforming it into poetry... Being an artist is a huge responsibility in the society because it's an open mind that proposes new current and mental structures.

Why am I an actress?

It is not because of the money.
Neither because of fame.

It is to tell **stories** about our present, about what we are worried about and what makes us happy, about what makes us angry and

what hurts us.

About what means a conflict to us which we still don't know how to solve. About the path we take as **humanity** in our actual history.

Individual stories reflecting all of us, through makes us look at us from an other perspective and to purge ourselves.

Stories that motivate us to think about ourselves, to get conscious and act different.

Stories that make me more tolerant, patient, understanding,... and more human.

Stories where I don't judge the characters that are different to me, instead of it, I love them, as I love the human being.
